Scope and methodology of the report

This report is designed to support:

- Business Services Leaders
- Process managers
- TA/ HR experts
- Investors
- Location strategy consultants

Salary data was gathered based on comparative analysis of salaries in 432 Business Services organizations, serviced by Gi Group Holding companies. Data about salaries was aggregated through analysis of a database of recruitment projects and candidate interviews in 1st and 2nd quarter of 2023. The criteria for establishing lower salary brackets are border values for which employees are willing to change jobs or are guaranteed by specific law regulations. Some market variance above and below these brackets does exist, but our report aims to deliver actionable information, rather than anecdotal examples.

All data about countries in this report were gathered from a variety of sources, comprising: OECD Statistics, Eurostat, International Labour Organization, International Monetary Fund, World Bank, as well as: national banks, statistical offices, ministries of education and labour.

Introduction

In recent years, the business services sector (BSS) has emerged as a cornerstone of global economic growth and a vital source of employment opportunities. Comprising shared services centres, global business services, business process outsourcing (BPO), information technology outsourcing (ITO), and research and development (R&D) centres, the BSS market is a critical driver of innovation and operational efficiency. As we explore the BSS landscape in 15 countries, it is essential to identify the top challenges and strengths that characterize this rapidly evolving market.

One of the foremost challenges faced by the BSS market worldwide is the ongoing digital transformation. The rapid pace of technological advancements and the widespread adoption of automation, artificial intelligence, and machine learning have significantly disrupted traditional BSS models. Organizations must continuously adapt and evolve to stay competitive in this digital landscape, investing in the right technology and upskilling their workforce to capitalize on new opportunities. Failure to do so can result in obsolescence and loss of market share.

Another pressing challenge for the global BSS market is the increasing complexity of regulatory and compliance requirements. As businesses expand their operations across multiple jurisdictions, they must navigate a diverse array of legal and regulatory frameworks. This can be a daunting task, requiring specialized knowledge and resources to ensure compliance and avoid potential penalties. Moreover, the ever-changing nature of these regulations demands constant vigilance and adaptability, putting additional pressure on BSS organizations.

Talent management is the third significant challenge faced by the BSS market. As the industry evolves, the demand for skilled professionals with specialized expertise in areas such as data analytics, cybersecurity, and process optimization continues to grow. However, the availability of such talent is often scarce, leading to a skills gap that can hinder the growth and competitiveness of BSS organizations. To address this challenge, companies must develop robust talent acquisition and retention strategies, as well as invest in continuous learning and development initiatives to nurture and upskill their existing workforce.

Despite these challenges, the BSS market is undeniably an attractive and vital sector for several reasons. One of its key strengths is the ability to drive cost efficiencies for organizations. By outsourcing non-core functions and leveraging economies of scale, businesses can achieve significant cost savings and focus their resources on core competencies and strategic initiatives. This enables them to remain agile and competitive in an increasingly complex and fast-paced global market.

Another notable strength of the BSS market lies in its capacity for fostering innovation. BSS organizations often serve as hubs of expertise, bringing together diverse perspectives and skillsets to develop innovative solutions to complex business problems. By tapping into this wealth of knowledge and experience, companies can accelerate their innovation efforts, improve their products and services, and ultimately enhance their value proposition to customers.

Finally, the BSS market's ability to enable business resilience and adaptability is a critical strength. The global business environment is characterized by uncertainty and volatility, with factors such as economic fluctuations, geopolitical tensions, and environmental concerns posing significant risks to organizations. By leveraging BSS providers' expertise and infrastructure, businesses can build more resilient and adaptive operating models, better equipped to navigate these uncertainties and capitalize on emerging opportunities.

We are hoping, that our report will present you with interesting and useful information about key countries in which Grafton operates in Business Services Sector.

Gi Group Holding

Business services globally

The global business services sector continues to play a crucial role in the worldwide economy, providing companies with cost-effective and efficient solutions to meet their ever-evolving needs. With the market projected to grow further, understanding the size, geographical clusters, and dominant trends on each continent is essential.

The global business services sector is estimated to be worth over € 1 trillion, with a significant portion attributed to the BPO and ITO markets. The industry has experienced consistent growth, driven by an increasing demand for cost-effective and efficient solutions across various industries. This sector employed millions of professionals worldwide, offering a diverse range of job opportunities and contributing significantly to the global workforce.

The business services sector is characterized by several geographical clusters, each with its unique advantages and reasons for attracting BSS organizations. Some key clusters include:

Central and Eastern Europe (CEE):

This region, including countries like Poland, Hungary, and Romania, has become a preferred destination for SSCs and R&D centres due to its well-educated workforce, competitive costs, and strategic location within the European Union.

India and the Philippines:

As two of the world’s largest BPO and ITO destinations, these countries offer a large, skilled, and cost-effective talent pool, coupled with strong English language proficiency and a favourable business environment.

Latin America:

Countries such as Brazil, Mexico, and Colombia have emerged as BSS hubs, with a growing number of global companies establishing centres in the region due to its proximity to the United States, time-zone alignment, and availability of skilled labour.

North America:

The United States and Canada are home to several high-tech and R&D centres, driven by the presence of leading technology companies, access to top talent, and strong government support for innovation.

Those large geographical clusters experience several trends shaping its landscape on each continent. The top three dominant trends include:

Europe:

- Digital transformation and increased adoption of cloud-based solutions.
- Shift toward multi-functional shared services and GBS models.
- Growing emphasis on environmental, social, and governance (ESG) factors.

Asia-Pacific:

- Rising demand for higher-value services, including analytics, consulting, and R&D.
- Expansion into tier-2 and tier-3 cities for cost optimization and talent availability.
- Adoption of agile and flexible workplace models, such as remote and hybrid work arrangements.

Latin America:

- Regional integration and collaboration to create a more competitive BSS environment.
- Development of industry-specific expertise in areas like finance, healthcare, and technology.
- Increasing focus on upskilling and reskilling the workforce to meet evolving demands.

North America:

- Adoption of automation and artificial intelligence (AI) to enhance efficiency and productivity.
- Focus on cybersecurity and data privacy to protect sensitive information.
- Emergence of nearshoring destinations like Mexico and Costa Rica.

As organizations around the world continue to adapt and innovate, the business services sector will also need to evolve to meet changing demands. Embracing new technologies, investing in workforce development, and aligning with global trends will be key factors in ensuring the long-term success and competitiveness of this thriving industry. By staying informed and strategically adapting to the global landscape, businesses in the BSS sector can continue to flourish and drive economic growth across the world.

Key trends in business services

Quality-oriented transition

The transition from simple shared services centres (SSCs) and process-oriented services to global business services (GBS) models and centres of excellence brings about significant changes in the way organizations manage their human resources, employer branding, and recruitment strategies. This transformation presents unique challenges and requires a fundamental shift in priorities and programs to ensure a seamless transition and long-term success. This article explores these challenges and shifts in detail.

1. Challenges in HR Management, Employer Branding, and Recruitment: During the transformation to a GBS model or centre of excellence, organizations face several challenges, including:

- a. Talent acquisition and retention: Attracting and retaining highly skilled professionals becomes a top priority as the focus shifts from basic processes to more complex, value-added services.
- b. Change management: Managing organizational change effectively is crucial to ensure a smooth transition and avoid disruptions to existing operations.
- c. Skill development and training: As the nature of services offered evolves, upskilling and reskilling the workforce become imperative to maintain a competitive edge.
- d. Cultural integration: Aligning the organizational culture with the new business model and fostering a culture of innovation and collaboration are essential for long-term success.

2. Shifts in HR Management Strategies and Priorities: To address the challenges associated with transforming into a GBS model or centre of excellence, HR management strategies need to adapt, including:

- a. Workforce planning and talent management: HR teams must develop a comprehensive workforce plan to identify and bridge talent gaps while ensuring effective succession planning.
- b. Performance management: Shifting from traditional performance evaluations to a more agile, continuous feedback system focused on development and growth.

- c. Employee engagement: Enhancing employee engagement through transparent communication, collaboration platforms, and recognition programs to foster a high-performance culture.
- d. Leadership development: Identifying and nurturing potential leaders who can drive innovation and growth in the new business model.

3. Shifts in Employer Branding and Recruitment Strategies: As organizations transform, employer branding and recruitment strategies must evolve to attract the right talent for the new business model:

- a. Employer value proposition (EVP): Redefine the organization's EVP to emphasize the new focus on innovation, growth, and career development opportunities.
- b. Targeted talent attraction: Develop targeted recruitment campaigns that showcase the organization's commitment to cutting-edge services, learning opportunities, and career growth.
- c. Campus recruitment and partnerships: Strengthen relationships with leading universities and institutes to attract top talent and build a strong talent pipeline.
- d. Talent analytics: Leverage data-driven insights to inform recruitment strategies, identify skills gaps, and predict future talent needs.

The transformation from a simple SSC or process-oriented service provider to a GBS model or centre of excellence necessitates a comprehensive reassessment of an organization's HR management, employer branding, and recruitment strategies. By addressing the unique challenges and embracing the required shifts in priorities and programs, organizations can successfully navigate this transition and reap the benefits of a more innovative, value-driven business model.

Employee value proposition: Must-have of any sustainable business services organization

Employee Value Proposition (EVP) is a critical concept for organizations seeking long-term growth and profitability. To a CEO primarily focused on financial results, it is essential to understand the role EVP plays in attracting, retaining, and motivating top talent, ultimately contributing to the organization's financial success. Employee Value Proposition refers to the unique combination of benefits, rewards, and opportunities that an organization offers its employees in return for their skills, expertise, and commitment. The EVP encompasses various aspects such as compensation, career development, work environment, and organizational culture. A strong EVP can help organizations differentiate themselves in the competitive talent market, ultimately leading to better financial outcomes through increased productivity, innovation, and reduced turnover costs.

1. Importance of Identifying, Developing, and Using EVP: An effective EVP is vital to an organization's success for several reasons:

- a. Attraction: A compelling EVP can help attract top talent who align with the organization's values and vision, directly contributing to improved financial performance.
- b. Retention: A well-defined EVP that delivers on its promises can increase employee satisfaction, loyalty, and engagement, reducing turnover costs and preserving valuable knowledge and expertise within the company.
- c. Motivation: A strong EVP can drive employee motivation by providing a sense of purpose and a clear understanding of the organization's commitment to their growth and well-being, ultimately leading to higher productivity and financial outcomes.
- d. Employer branding: A clearly articulated EVP enhances the organization's reputation as an employer of choice, making it easier to attract and retain top talent in the long run.

2. Implementing EVP and its Impact on the Organization: To effectively use EVP, organizations should:

- a. Assess the current state of their EVP by gathering feedback from employees and benchmarking against competitors.
- b. Develop a comprehensive EVP strategy that addresses employee needs and aligns with the organization's strategic goals.

- c. Communicate the EVP clearly and consistently to both current and prospective employees through various channels, including recruitment materials, onboarding, and internal communications.
 - d. Continuously monitor, evaluate, and adjust the EVP to ensure its ongoing relevance and effectiveness.
- A well-implemented EVP can have a positive impact on the organization by driving employee engagement, innovation, and productivity, which ultimately contribute to improved financial results.

3. Identifying Key EVP Bottlenecks: Organizations may face challenges in implementing a successful EVP due to various bottlenecks, such as:

- a. Lack of strategic alignment: Inconsistencies between the EVP and the organization's overall strategy can lead to confusion and misaligned expectations among employees.
- b. Insufficient communication: Failure to effectively communicate the EVP to employees and potential candidates can result in a weak employer brand and low employee engagement.
- c. Inadequate delivery: If an organization does not deliver on its EVP promises, it can lead to employee dissatisfaction, reduced trust, and increased turnover.
- d. Resistance to change: Implementing a new EVP may face resistance from employees, especially if it involves significant changes to existing policies or practices.

A well-defined and effectively implemented Employee Value Proposition can be a powerful tool for organizations seeking improved financial results. By understanding the importance of EVP and addressing potential bottlenecks, CEOs can ensure that their organizations attract, retain, and motivate top talent, ultimately driving long-term growth and profitability.

The challenges and opportunities of hybrid work in large BSS organizations

In a post-COVID world, the rapid and dramatic emergence of hybrid work, a combination of remote and in-office work, has transformed the way business services sector organizations operate. While hybrid work offers several benefits, it also presents unique challenges, no matter the size of organization. But, of course, in bigger organizations, the challenge is greater because of the sheer volume of employees choosing this model.

1. People Management Challenges:

- a. Motivation: Maintaining motivation and engagement among employees who work remotely and in the office can be challenging, as remote workers may feel disconnected from the company culture and in-office activities.
- b. Management: Supervising and coordinating employees working in different locations requires managers to adopt new communication and collaboration strategies, which can be difficult to implement effectively.
- c. Psychological stability: The lack of clear boundaries between work and home life can lead to increased stress and burnout among remote workers, impacting their overall well-being and productivity.
- d. Trust: Building and maintaining trust between team members and management can be challenging in a hybrid work environment, as remote employees may feel scrutinized or left out of important decisions.
- e. Productivity: Ensuring consistent productivity levels among employees working in different environments can be challenging, as remote workers may face distractions or lack access to essential resources.

2. IT Support Challenges:

- a. Efficiency: Providing efficient IT support to both remote and in-office employees requires a robust and scalable infrastructure, which can be costly and time-consuming to implement and maintain.
- b. Stability: Ensuring a stable and reliable connection for remote workers is crucial, as network downtime can lead to significant productivity losses and increased frustration among employees.
- c. Safety: Protecting sensitive data and maintaining cybersecurity across various locations and devices is a critical concern, as remote work can increase the risk of data breaches and cyberattacks.

3. Employment Stability Challenges:

- a. Stability of employment: Adapting to fluctuations in workforce requirements due to changing work arrangements can be challenging, as organizations may need to invest in additional resources to accommodate remote employees.
- b. Employment costs: Implementing hybrid work can lead to increased costs related to technology, office space modifications, and employee support programs.
- c. Fluctuation of attrition and hiring needs Navigating the complexities of employee retention and hiring in a hybrid work environment can be challenging, as organizations may struggle to find the right balance between remote and in-office staff.

The challenges and opportunities of hybrid work in large BSS organizations

More than two years of experience with hybrid work, already shows that it presents significant challenges, and the top ones to address, are:

- a.** Inconsistent employee experience: Hybrid work can create disparities in employee experience and access to resources, leading to potential feelings of inequity among the workforce.
- b.** Difficulty in fostering collaboration and team cohesion: Remote work can hinder team collaboration and cohesion, as employees have fewer opportunities for face-to-face interactions and spontaneous conversations.
- c.** Increased management complexity: Managing a hybrid workforce requires new skill sets and strategies, which can be challenging for managers to develop and implement effectively.

So why to adopt hybrid work? Well, as we all know already, being employed with hybrid models definitely allows for:

- a.** Flexibility: Hybrid work offers employees greater flexibility, allowing them to balance their personal and professional lives more effectively, and improving overall job satisfaction.
- b.** Access to a wider talent pool: By adopting hybrid work, organizations can tap into a broader talent pool, not limited by geographical constraints, and attract top talent from diverse backgrounds.
- c.** Cost savings: Over time, organizations can achieve cost savings through reduced office space requirements and lower overhead expenses related to in-office employees.

By carefully considering the pros and cons of hybrid work, BSS organizations can develop a well-balanced work model that supports employee well-being and productivity. Definitely one of the top challenges for managers is the creation of a culture of trust and collaboration among remote and in-office employees.

The Future of work in the BSS sector is going to be a combination of remote and in-office arrangements. As we can already observe, this is unavoidable, and the key challenges now are to adapt to it and build a more agile, diverse, and resilient workforce.

Company culture identification, cheat-sheet

Successfully transforming company culture requires a comprehensive and systematic approach, encompassing culture identification, verification, implementation, monitoring, and continuous improvement. By following this framework, organizations can create a strong and adaptive culture that supports employee well-being, drives business success, and positions the organization for long-term growth and resilience.

1. Culture Assessment and Identification:

- a. Begin by conducting anonymous employee surveys to gauge their perceptions and opinions on the existing company culture. This will provide valuable insights into employees' needs, expectations, and challenges.
- b. Organize focus groups and one-on-one interviews with employees across different departments, hierarchical levels, and tenure. These discussions will help gather qualitative data to understand the nuances of the current culture and identify areas of improvement.
- c. Review the organization's existing values and mission statement to assess their alignment with the current culture. Determine if any revisions are necessary to better reflect the desired culture.
- d. Analyse key performance metrics, such as employee retention, engagement, and productivity, to understand the impact of the current culture on business outcomes.

2. Culture Verification:

- a. Based on the findings from the assessment phase, identify the core cultural elements that contribute to a positive and productive work environment. These elements should align with the organization's strategic objectives and promote employee well-being.
- b. Compare the organization's culture against industry best practices and successful competitors. This benchmarking process will help identify gaps and opportunities for improvement.
- c. Involve leaders and key stakeholders in the verification process to ensure that the identified cultural elements align with the organization's vision and strategic goals. This will also help foster buy-in and support for the upcoming culture implementation program.

3. Culture Implementation:

- d. Create a comprehensive plan outlining the strategies and tactics required to implement the desired culture. This plan should include clear objectives, timelines, and responsibilities, as well as communication and change management strategies.
- e. Effectively communicate the new culture to all employees, ensuring that they understand the rationale behind the changes and how they will impact their daily work. Use multiple communication channels, such as town hall meetings, newsletters, and intranet updates, to reach employees at all levels of the organization.
- f. Embed the new culture into the organization's HR processes, including recruitment, onboarding, performance management, and learning and development. This will help reinforce the desired behaviours and values throughout the employee lifecycle.
- g. Identify and train culture champions from different departments who will advocate for the new culture, support their colleagues through the change process, and act as role models for the desired behaviours.
- h. Ensure that the organization's leadership team consistently models the desired behaviours and values. This may involve coaching, mentoring, or formal leadership development programs.

Company culture identification, cheat-sheet

4. Culture Monitoring and Evaluation:

- i. Re-develop key performance indicators (KPIs) to measure the impact of the new culture on employee engagement, productivity, and retention. Regularly monitor these KPIs to assess the effectiveness of the culture implementation program and identify areas for further improvement.
- j. Perform periodic culture audits to evaluate the ongoing alignment between the organization's values, behaviours, and strategic goals. Use the findings to make data-driven decisions and continuously refine the culture implementation plan.
- k. Encourage employees to provide regular feedback and suggestions for improving the company culture. This will help create an environment of continuous improvement and maintain a strong, adaptive culture, that evolves with the organization's needs and objectives.
- l. Implement recognition and reward programs that acknowledge and celebrate employees who embody the desired cultural values and behaviours. This will help reinforce the new culture and motivate employees to consistently align with the organization's vision.
- m. Based on the monitoring and evaluation outcomes, adjust and refine the culture implementation strategies as needed. This may involve introducing new initiatives, modifying existing ones, or providing additional resources to support employees through the culture transformation process.

5. Sustain and Evolve Company Culture:

- a. Maintain open communication channels with employees to keep them informed of any culture-related updates and to provide opportunities for them to voice their concerns and ideas. This will help foster trust, transparency, and a sense of ownership in the organization's culture.
- b. Periodically review and update the organization's culture to ensure it remains relevant and aligned with the evolving business landscape and workforce demographics. This may involve revisiting the company values, mission statement, and core cultural elements.
- c. Invest in ongoing leadership development programs to ensure that the organization's leaders continue to model the desired cultural values and behaviours. This will help maintain a strong culture and facilitate the development of future leaders who can carry on the cultural legacy.
- d. Foster a culture that encourages innovation and adaptability by promoting collaboration, experimentation, and continuous learning. This will enable the organization to remain agile and responsive to the changing business environment.

Bulgaria

Ivelina Petkova

Business Manager, Wyser

With nine years of experience in Business Consulting, I specialize in HR, Executive Search, and Senior & Middle Management Recruitment. As the leader of Wyser in Bulgaria since 2021, I focus on high-caliber professional recruitment, strategic and difficult-to-fill roles, and high-level management positions in various industries, including ITOs/BPOs sectors. Our team comprises experienced business advisors with strong market network and knowledge.

I am passionate about lifelong personal and professional development, valuable business contacts, and shared knowledge. My interests include travelling, healthy living and eating, self-development, music, and art.

What is the strongest Business Services segment in your country?

Bulgaria’s outsourcing sector is becoming increasingly important to its economy each year. The Information Technology Outsourcing (ITO) segment is the largest, making up about 52% of the industry. Business Process Outsourcing (BPO) represents roughly 45%, and Research and Development (R&D) constitutes the remaining 3%. The recent growth of new outsourcing companies has primarily occurred in the BPO and ITO sectors, with the Shared Service Centres (SSCs) sub-segment being the most dynamic.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Bulgaria is becoming recognised as a European digital hub, shifting from being primarily a cost-effective nearshoring destination.
- The Business Services sector in Bulgaria is expected to double in size by 2025, with an increased presence of R&D centres and mergers and acquisitions.
- Companies are expected to focus more on creating high-quality products and engaging mid-senior experienced employees instead of inexperienced ones.

What do you think the future of Business Services in your territory will be?

Bulgarian tech companies are likely to focus on creating more value, transitioning from support and services to product creation, innovation, research, and development. The cost pressures on the sector that began in 2022 will continue in 2023, leading companies to focus on cost-saving models of work and a slowdown in hiring. Bulgaria may benefit from geopolitical developments worldwide by attracting units of companies from China, India, and other Asian destinations.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- The industry is the largest educational provider in Bulgaria, with three universities offering master’s programmes in Business Services, and a multilingual workforce speaking 35 languages.
- Over 11,600 students have graduated in computer science/software development in the last five years, ensuring a skilled talent pool.
- Bulgarian employees excel at managing various time zones and location specifics, and are highly valued for their geographical and cultural adaptability.

What are three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Investors should focus on talent pool strategy, market expansion, and financial discipline to address challenges related to recession, inflation, and geopolitical crisis.
- Recognise the fierce competition for candidates in Sofia and Plovdiv, where higher rewards may be necessary, and invest in employee engagement and digital and social recruiting.
- Prioritise well-developed digital infrastructure, fast broadband, and affordable office space in major Bulgarian cities when choosing a location for investment.

Czech Republic

Hana Orgonova
Head of Professional Practice
Czech Republic & Slovakia

Of my 10.5 years’ experience in the HR sector, 9 of them have been in Grafton. I have worked in both internal and external HR roles, with a strong focus on temporary staffing services and permanent placement services.

At Grafton, I strive to maintain a friendly and professional atmosphere while providing strong HR support to clients. In my free time, I enjoy travelling, exploring new cuisines, and cooking.

What is the strongest Business Services segment in your country?

The Czech Republic’s business services market is diverse, with the Business and Professional services sector leading at around 20% of all BSCs. The Technological, Telecommunication and Manufacturing sectors follow closely behind. Top service areas provided from the Czech Republic include F&A, HR, IT services, Data Analytics, and Customer Operations.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

The key trends for 2023 in the Business Services sector are:

- Customer centricity: Focusing on delivering exceptional customer experiences.
- Acceleration of digital transformation: Embracing new technologies and adapting to the digital landscape.
- Sustainability: Prioritizing environmentally-friendly practices and social responsibility.

What do you think the future of Business Services in your territory will be?

The Business Services sector in the Czech Republic is expected to continue growing and expanding its activities, attracting new customers. The industry will likely experience a high demand for adapting to hybrid workspaces and potential AI integration, particularly in transactional services.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Safety: The Czech Republic is among the world’s safest countries, a crucial factor during tumultuous times in Europe.
- Quality of life: The country offers political and economic stability, an excellent telecommunications infrastructure, and an efficient public transportation system.
- Attractiveness to foreigners: The Czech Republic’s high quality of life and safety attracts a diverse talent pool from around the world.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Analyse local competition: Understand the competitive landscape and identify potential opportunities in the market.
- Focus on employer branding: Choose an experienced and exclusive recruitment partner to guide you through the entire recruitment process.
- Act promptly: Now is an ideal time to invest in the Czech Republic’s Business Services sector.

Allan Eigi
CVO/SIMPLIKA
BUSINESS MANAGER

I have more than 7 years of experience working in both the public and private sectors. During this time I have held several positions such as Sales Manager, Project Manager, and Marketing Manager.

For the past 3 years, I have worked in the HR sector and managed the full sales process and key accounts management for both local and international clients.

In addition to hundreds of successful client stories that I have been a part of, I also like to lead the whole negotiation process, shape and design the services for the local and international market, and be part of business development.

I have an applied higher education qualification in the field of business management, specializing in HR and the Financial sector.

What is the strongest Business Services segment in your country?

Estonia’s job market is diverse, but the IT and technology sector is particularly strong, making the country a hub for IT R&D. Industrial products and technology, electronics/IoT/mechatronic solutions sectors are also growing, supported by expertise and a competitive digital environment. The finance and FinTech sectors are expanding significantly as well, thanks to technological advancements. Estonia has also become a hub for international businesses launching IT development, shared services, or support centre operations.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Employees’ reluctance to change jobs: People in permanent positions are less willing to change jobs, with companies making counteroffers to retain their best talent during uncertain times.
- Importance of meaningful work and flexibility: Employees prefer workplaces that align with their personal values and care about their health and wellbeing, as well as offer flexibility in working hours and locations.
- Growing salary expectations: Inflation and turbulent times are causing salary expectations to rise.

What do you think the future of Business Services in your territory will be?

Estonia’s labour market is relatively small, and there is a labour shortage, so the need for skilled talent remains high. As the economy recovers and businesses adapt their strategies, hiring is expected to increase. Active recruitment also means intense competition for candidates, so having a well-thought-out, effective, and proactive recruitment process is essential to attract top talent and build a strong team.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Highly skilled workforce: Estonia has a pool of talented professionals across various sectors.
- High-quality education: The country’s vocational and higher education system prepares individuals for the job market.
- Entrepreneurial mindset: Estonians are known for their adaptability and innovation.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Conduct research and engage with experts: Understand the market and seek advice from recruitment, HR, legal, finance, and tax professionals.
- Have a clear understanding of the profile and expectations: Know who you are looking for and why.
- Offer attractive and flexible working conditions: Ensure your workplace conditions are competitive and aligned with market expectations. To attract top talent, know your uniqueness and how to stand out.

Hungary

Tamás Farkas

Business Unit Manager, Grafton

I have 10 years of experience in recruitment, specializing in technology and business-related recruitment, key account management, E2E, and mass recruitment. I started as a Recruitment Team Leader, leading IT and finance recruiters, placing candidates in permanent and temporary positions while ensuring the highest recruitment standards. Currently, I oversee recruitment operations for multiple teams and take responsibility for the company's largest clients; setting goals, defining strategies, and consistently delivering exceptional outcomes.

What is the strongest Business Services segment in your country?

The SSC market in Hungary has shifted towards supporting financial functions, with 47% of BSCs in Hungary now supporting financial, 18% IT, and 13% customer service fields. There is also a growing trend of outsourcing HR functions, with several HR SSCs opening and operating in recent years. Finance positions increasingly require accounting skills, leading to the opening of complete FSSCs.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Growing demand for specialized skills: Finance and accounting skills are particularly sought-after, with accounting skills similar to those of big4.s becoming a requirement.
- Sought-after foreign languages: German, Italian, and French remain the most in-demand languages, but professional background knowledge is increasingly important.
- Competition for finance candidates: Accounting firms, multinationals, big4s, and SSCs all compete for top talent in the financial field.

What do you think the future of Business Services in your territory will be?

The growth of the BSC sector in Hungary has not been halted by COVID, and some functions which were not originally planned for Hungary have arrived in the country due to cost reductions. There might be stagnation in the next 1-2 years, with headquarters stopping outsourcing and taking time to study further expansion. Lower-skilled positions may move to other countries, while higher value-added functions will become even more prevalent in Hungary.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Highly skilled labour market: Hungary has a skilled workforce with experience in transferring functions.
- Government support: The country offers incentives and support for BSCs.
- Job-seeking openness: 70% of candidates are willing to interview for new positions, and many choose the SSC sector to keep up with the rapid rise in inflation.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Avoid customer service shift work: Candidates prefer normal working hours and better work-life balance.
- Invest in language training: Offer training in finance-related second languages to attract and retain talent, and do not overlook candidates with only writing skills.
- Communicate the big picture: Help candidates understand the company's mission and the value they can add to it.

Latvia

Julija Lobanovska

Business Leader, CVO Recruitment

I am Julija Lobanovska, with 22 years of experience leading perm and temp businesses in Latvia. I have built recruitment teams, consulted clients, managed complex recruitment projects, and attracted foreign investors. My expertise also includes creating new workplaces in Latvia. My team in Latvia consists of seven experienced and professional members who provide multilingual services to both local and international clients.

In my free time, I am a traditional folk singer and have participated in the Nationwide Latvian Song & Dance Festival. My motto is “When you change yourself, the world you live in changes.”

What is the strongest Business Services segment in your country?

Automation and robotization is estimated to affect 43% of GBS centres in 2023.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

The BSC industry has been constantly growing in the past years and now employs 17,000 people. The industry continued to show an increase in salary levels and maintained a status of attractive perspective employers.

What do you think the future of Business Services in your territory will be?

Through years of operating in Lithuania, Business Services Centres have developed strong organizational structures, invested in people development, brought new skills to the talent market. This now offers a wider range not only of specialists, but also of people ready for managing functions, structures and organizations in Lithuania. With this developed sector maturity, BSC’s can strive for higher efficiency and productivity.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

There are 52 higher education institutions in the area with a student population of 79,000, providing a diverse pool of potential employees with a strong educational background and language skills in Scandinavian languages, Russian professionals, and German. The local workforce is characterized by a strong work ethic and a drive to grow and develop their careers.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Conduct a talent market analysis to understand the available skills and salary levels in the region.
- Develop an employer brand and value proposition that resonates with local talent and addresses their priorities and expectations.
- Ensure a smooth knowledge transfer process for key personnel in the new BSC to accelerate the learning curve and achieve operational efficiency.

Valerija Buzėnienė

Business Manager Lithuania,
Simplika & CVO Recruitment

With over 20 years of experience in recruitment and HR, I have built teams, managed complex recruitment projects, and acted as a consultant for clients. I am a published author and a frequent speaker at national HR events. I also host an HR podcast titled “Žmogiškieji Iššūkiai.”

My Lithuanian team consists of 22 experienced professionals who provide multilingual services to both local and international clients.

What is the strongest Business Services segment in your country?

In Lithuania, the strongest segments in the business services sector are IT and finance. 42% of BSCs are technology-related, and 51% of the workforce is employed in finance, with accounting making up 23% of this sector.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Growth of the BSC industry: The BSC industry in Lithuania has been steadily growing, with over 23,000 employees working in the sector and offering attractive employment opportunities and increasing salary levels.
- Workforce development: BSCs have been investing in the development of their workforce, resulting in a diverse pool of specialists and potential managers.
- Sector maturity: Due to the robust organizational structures and developed workforce, BSCs in Lithuania are better equipped to achieve higher levels of efficiency and productivity.

What do you think the future of Business Services in your territory will be?

The future of the business services sector in Lithuania looks promising, with the continued growth and development of the BSC industry. As BSCs become more mature and efficient, they will continue to attract foreign investment and offer attractive employment opportunities in the country.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Talented and diverse local workforce: Lithuania boasts a skilled workforce with a strong work ethic and drive for growth.
- Excellent education: The Lithuanian workforce has a high level of education, providing a solid foundation for the business services sector.
- Language skills: The local talent pool in Lithuania offers a wide range of language skills, making it an attractive location for BSCs serving global markets.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Conduct a thorough analysis of the talent market to assess the supply of skills required for the BSC. This will help identify any potential gaps and enable effective talent acquisition and retention strategies.
- Develop a strong employer brand and EVP (employer value proposition) that resonates with local talent and their priorities. This will help attract top talent and improve employee engagement and retention.
- Ensure a smooth initial knowledge transfer process for key personnel entering the new BSC. This will facilitate the transfer of critical knowledge and skills and ensure a seamless transition.

Poland

Joanna Wanatowicz

Managing Director, Grafton Recruitment

I provide consulting services in the areas of employment policy, recruitment, and staff migration. With years of expertise in the labour market, I regularly hold sessions with foreign investors.

Having been with Grafton Recruitment for 14 years. I previously served as the Regional Director, where I successfully developed the agency's branches in Southern and Central Poland. Currently, my focus is on expanding and strengthening the agency's presence across the country.

Before joining Grafton, I worked for the consultancy firm Stegmann. With almost 20 years of experience in recruitment, I am a graduate of the University of Silesia in Katowice.

What is the strongest Business Services segment in your country?

The strongest segment of the Business Services industry in Poland is IT outsourcing, followed by accounting and finance, HR and payroll, marketing, and customer service. These segments have experienced significant growth in recent years, with supply chain roles, HR and payroll, and marketing showing particularly strong growth in 2022.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- **Multiculturalism:** The business services sector in Poland is characterized by its multicultural workforce, with employees from 50 countries providing services in 35 languages. English is the dominant language, spoken by the majority of employees. This diversity brings a unique mix of perspectives and ideas to the sector.
- **Adaptability:** The ability to adapt quickly to changing circumstances will be crucial for the further development of organizations in 2023. Rigid structures and long-term plans are no longer effective in a constantly evolving environment. Flexibility and adaptability will be key to success.
- **Remote work:** Remote work has become a strong trend in the Polish labour market, with many companies adopting hybrid work models. This has allowed employees to work from anywhere and has opened up opportunities to work for companies around the world without the need for relocation. The quick adaptation to remote work has brought increased efficiency and cost savings for companies.

What do you think the future of Business Services in your territory will be?

Despite the unstable economic and political situation, the Business Services sector in Poland is expected to continue its rapid development and create high-tech jobs. Stable forecasts predict a growth rate of around 4% in 2023. The increasing pace of technological change, accelerated by the pandemic, has created a higher demand for specialists with expertise in areas such as cloud architecture, Big Data, process automation, and cybersecurity. Digital skills are also becoming increasingly necessary in other industries, including marketing, sales, logistics, finance, and accounting.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- **Strategic location:** Poland's central location in Europe makes it an attractive option for foreign investment. It provides easy access to major markets and allows for cost savings compared to Western and Northern European countries.
- **Skilled workforce:** Poland has a developed and mature market for shared services, with highly skilled specialists in accounting, HR, and customer service. The workforce also has strong language skills, including niche languages.
- **Cost-effectiveness:** Employment costs in Poland are significantly lower than in many other European countries, making it an appealing option for companies looking for cost savings without compromising on quality.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- **Work with a consulting company:** Prior to investing in Poland, it is advisable to work with a consulting company to gain insights into the local market, competition, and hiring trends. This will help in developing an effective recruitment strategy and understanding salary expectations.
- **Focus on employer branding:** Pay attention to the cultural aspect and properly represent your employer brand. Hiring managers should be well-prepared to build a positive image of your business during candidate interviews. Employer branding plays a crucial role in attracting and retaining top talent in Poland.
- **Establish strong partnerships:** Instead of multiplying suppliers, focus on building strong partnerships with a few trusted and verified partners. Trust, and understanding expectations are key to efficient and smooth operations, including recruitment processes.

Portugal

Isaura Devesa

Manager Grafton

I have been working in volume recruitment for 9.5 years now, and 5.5 of those with Gi Group. Previously I spent 3 years managing volume recruiting in Siemens and BNP Paribas, and another year with RPO projects for BNP Paribas.

My future plans involve specializing in the development and growth of RPO/volume projects. Currently, we have seven people dedicated to RPO/volume projects, and are expanding the RPO team now to meet demand.

As a mother of a two-year-old boy, I love spending time with family and friends. I am focused on team growth and seeing my colleagues learn and grow every day.

What is the strongest Business Services segment in your country?

The strongest business services segment in Portugal covers junior, senior, and management positions in accounts payable and receivable, OTC, RTR, payroll, Workday, SAP FI/CO, project managers, and employee support.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Language skills: Advanced English and other language skills are in high demand in the business services sector.
- Safety: Companies are focusing on providing a safe working environment for their employees.
- Low salaries and inclusive culture: Portugal offers competitive salaries and a diverse, inclusive work culture that attracts businesses to the country.

What do you think the future of Business Services in your territory will be?

In the last two years, several new SSC/GBS centres have opened in Portugal, including Organon, Essity, Amgen, and Airbus. These companies are satisfied with their strategy and decision to expand in Portugal and plan to continue growing. The market has the potential to open around 100 to 200 positions per year in the IT, HR, and Finance areas.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Low salaries: The average salary in Portugal is €16,800 per year, making it a cost-effective location for business services.
- Language skills: The workforce in Portugal has excellent language skills, especially in English.
- Geographical advantage: Portugal is a small country, making it easy to create a hub in the capital, Lisbon, and have employees from other cities work remotely or travel to the main office when needed.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Develop a strong employer branding strategy in collaboration with international HR and local teams, and recruit an experienced HR professional with a background in SSC/GBS projects to help with the start up phase.
- Begin recruitment with strong senior profiles or a GBS/SSC head to define the company’s strategy.
- Implement an internal referral program, allowing senior profiles to bring in other talented professionals to the organization.

Romania

Elisabeta Moldoveanu

Business Unit Manager, Grafton

I have been working in fast-paced environments that require direct customer interaction for the last 10 years. My communication skills, ability to adapt to different interlocutors, and curiosity have been my biggest assets.

With a passion for human interaction, HR has been the perfect professional path for me. The Romania Grafton team, consisting of experienced HR and recruitment professionals, is the perfect fit. We aim to provide internal advisory services to our clients, offering the best guidance and advice on HR-related decisions.

I am married and have a female beagle named Arya and a male stray cat. My passions include movies (especially horror and sci-fi/fantasy), foreign languages, neuroscience, and personal development.

What is the strongest Business Services segment in your country?

The top four sectors serviced in Romania are Technology, Banking, Insurance & Financial Services, and Business & Professional Services. The top five services provided are Procurement & Supply Chain Management, IT Services, Finance & Accounting, Customer Operations, and HR.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

Despite challenges, Romania’s Business Services industry is growing, with an increase in employment of almost 30% in the past three years. Companies are focusing on IT, customer support, finance, and accounting, requiring employees with greater technical skills, digital skills, and foreign language proficiency. The industry showed a revenue increase of 22% in 2022 compared to the previous year, with 70% of companies anticipating a turnover increase.

What do you think the future of Business Services in your territory will be?

- Romania’s location in the GMT+2 time zone and accessibility make it attractive for IT companies in Europe and the US.
- The Business Services sector accounts for 2-2.5% of Romania’s GDP, with a skilled workforce proficient in up to 30 languages.
- The country’s low labour costs and skilled workforce make it an ideal destination for IT outsourcing.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Partner with local consultancy services to gain insights into the market, trends, tax and labour systems, and talent pools.
- Invest in experienced and professional staff, especially HR managers and leaders of other key departments, to develop and promote a healthy company culture.
- Create an attractive employee value proposition, considering career paths, growth opportunities, flexible schedules, balanced KPI systems, healthcare packages, and other elements that matter to potential employees.

Slovakia

Hana Orgonova
Head of Professional Practice
Czech Republic & Slovakia

Of my 10.5 years of experience in the HR sector, I spent 9 years at Grafton. I have worked in both internal and external HR roles, with a strong focus on temporary staffing services and permanent placement services.

At Grafton, I strive to maintain a friendly and professional atmosphere while providing strong HR support to clients. In my free time, I enjoy travelling, exploring new cuisines, and cooking.

What is the strongest Business Services segment in your country?

In Slovakia, corporate shared service centres are well-balanced across sectors, with a strong presence in finance, HR, customer services, and other related functions. Up to 80% of the shared service centres in Slovakia cover advanced areas of customer support, finance or IT.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Slowdown in recruitment for core workforce positions, leading to increased interest in temporary assignments and outsourcing services.
- Emergence of new shared corporate service centres and increased recruitment activity.
- Competition for foreign employees remains high, with a focus on shared jobs, process streamlining, automation, and digitalization in the industry.

What do you think the future of Business Services in your territory will be?

Slovakia is expected to continue to thrive in the shared services segment, as it has been a popular region for investment in shared service centres due to its central location and the availability of labour.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Highly qualified, loyal, and multi-lingual workforce.
- Relatively low labour costs compared to Western European countries.
- High worker productivity, allowing investors to achieve higher efficiency and profitability.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Offer competitive compensation and benefits to attract high-quality candidates in Slovakia’s labour market.
- Set realistic timelines for the recruitment project to ensure a smooth process and prevent delays.
- Maintain clear and prompt communication with candidates throughout the process, even in the case of unsuccessful applications, to maintain a positive employer brand.

Spain

Diego Ciria

Business Director, Grafton

With 10+ years in HR roles for L’Oréal and Johnson & Johnson, I believe persistence is the key to success. Since Grafton’s launch in Spain in April 2022, I have been an integral part of the team. Maintaining a global perspective and executing planned strategies with a clear vision of achieving larger goals is crucial to me. Humanitarian aid has been significant part of my personal and professional growth, contributing to development projects in India and South Africa through a social talent program.

Joining Grafton as an Associate Director last year was a huge challenge, positioning the firm as a company of reference within the industry for both clients and candidates. Building a team from scratch is never easy, but being part of the Gi Holding family made it simpler. Assembling a team means creating a family that supports each other, shares the good things, and finds solutions for any issues that arise.

Sports are an essential part of my life, including skiing, surfing, biking, wakeboarding, paddleboarding, soccer, and running. Combining my love for sports and travel, I spend quality time with my family on vacations and weekends.

What is the strongest Business Services segment in your country?

In Spain, the strongest segment in the business services sector is technology services. This is due to the growing need for companies to manage data storage and analysis, which is vital for their growth. Human resources (HR) is another important segment, responsible for employee onboarding, talent management, and employee experience management. Both technology and HR are part of global business services, which help companies save costs and improve performance by sharing resources and standardizing processes. Procurement and finance are other areas commonly outsourced through global business services. The sectors that mostly use global business services in these segments include banking and insurance, telecommunications, health and pharmaceuticals, energy, and manufacturing.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

The three predominant trends in Spain in the Business Services sector are, firstly, the application of new technologies such as artificial intelligence and machine learning, enabling process automation and unified service experiences. Secondly, enhancing customer and/or employee experience by transforming processes for operational efficiency. Lastly, sustainability is becoming a focus, particularly in the manufacturing and logistics industries, to improve process efficiency, reduce costs, and facilitate the transition to the digital era.

What do you think the future of Business Services in your territory will be?

The future of the industry in Spain is marked by a volatile environment requiring companies to be agile in decision-making and employees to constantly upskill. Outsourcing is becoming an attractive option for companies to keep pace with market demands. The exponential growth in the global business services sector, especially technology solutions and data management, is expected due to the need for automation and efficient task management.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

Spanish professionals are well-prepared, adaptable, and creative. They benefit from a high-quality education system, including internationally recognised business schools. Madrid, in particular, is home to numerous universities producing around 40,000 graduates annually. The Spanish workforce is also known for its good productivity ratios, work-life balance, and adaptability to remote work.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Consider the flexibility of wage determination in Spain, which may lower costs compared to other European countries.
- Keep in mind that the cost of establishing a company in Spain is likely lower, but bureaucratic procedures can be extensive.
- Offer competitive compensation and benefits to attract and retain high-quality talent in the Spanish labour market.

United Kingdom

Nitasha Hayer

Director

Started recruitment career (12 years experience) within the retail sector and moved into Marketing and Digital 6 years ago. I worked for Michael Page, recruitment agency, for 11 years where I was the Director of their Retail, Marketing and Digital divisions. Within this role I led teams that in 2021 had a productivity of £16k a month and in 2022 £18k productivity a month.

I joined Grafton a month ago as Director of the UK business. My plans within Grafton are to find Grafton an identity within the market specifically on the Disciplines we will cover. Whilst working under Matt Wilcox alongside the Marks Sattin brand, we will look to expand within commercial functions i.e. Marketing, Digital, HR, Procurement. This will enable us to work more collaboratively as a group.

Having just returned from maternity leave, I have a very busy life looking after my 10 month old son, Rowan. I love food, so have a passion for eating out and I love to travel where I have already taken Rowan on 3 holidays, and we are also off to Dubai in November.

What is the strongest Business Services segment in your country?

In the UK, the strongest segment of the Business Services industry is IT outsourcing. The market has experienced steady growth in recent years, with a projected annual growth rate of 4.8% from 2020 to 2025. Other significant segments of the Business Services industry in the UK include finance and accounting outsourcing, human resources outsourcing, and sales and marketing outsourcing.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Increased adoption of automation and artificial intelligence in Business Services processes, which will lead to improved efficiency and cost savings.
- Greater emphasis on data privacy and cybersecurity due to increased regulatory scrutiny and heightened awareness of data breaches.
- The continued rise of remote work and flexible working arrangements, leading to a greater demand for virtual Business Services solutions.

What do you think the future of Business Services in your territory will be?

The future of the Business Services industry in the UK is expected to be shaped by the increasing adoption of technology and automation, along with the continued trend towards remote work. Companies will need to adapt to these changes by finding innovative ways to deliver their services in an efficient and cost-effective manner.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

The UK has several unique assets that make it an attractive location for foreign investment in Business Services, including:

- The English language is widely spoken in the UK, making it easy for companies to communicate with their clients and customers.
- The UK has a highly skilled and diverse workforce, with people from different backgrounds and cultures who can bring unique perspectives and ideas to the table.
- The UK has a strong culture of innovation and entrepreneurship, which can help companies stay ahead of the curve and find new opportunities for growth.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Take the time to understand the local market and regulatory environment, as well as the cultural and linguistic nuances that can impact the success of your business.
- Invest in talent acquisition and retention, as the quality of your workforce will be a key factor in your success.
- Focus on building strong relationships with your clients and customers, as well as with other key stakeholders in the industry, to establish a strong reputation and position your business for long-term success.

Maria Fernanda Lopes Laurent

Senior Business Manager, Grafton

I have been the Senior Business Manager of Grafton in Brazil since 2021. I develop the brand, manage new business development and delivery teams, and create business strategies. I hold a Master’s degree in business management.

After graduating from university, I lived in London for ten years, where I began my journey in strategic recruitment solutions. Upon returning to Brazil, I worked for a leading RPO firm for several years, where I was part of the sales and solution design team. I have proven experience in leading high volume recruitment projects across South America, establishing a solid reputation for building extensive consultative relationships with clients.

What is the strongest Business Services segment in your country?

The financial sector is by far the most significant segment of the business services industry in Brazil. The services sector is the largest in the country, contributing nearly 65% to its gross domestic product. This sector has developed with various sub-sectors such as hospitality, financial services, retail sales, and personal and professional services.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

The top three most significant trends in the Brazilian business services sector in 2023 are:

- An increase in financial planning and analysis (FP&A) activities, as businesses place a greater emphasis on strategic decision-making and financial management.
- The widespread digitalisation of services, which enables businesses to streamline operations and improve efficiency.
- The expansion of the scope of services offered, as companies diversify their portfolios to meet the evolving needs of the market.

What do you think the future of Business Services in your territory will be?

The financial sector continues to be the most crucial segment of the services industry in Brazil. Brazilian banks demonstrated considerable resilience during the 2008 financial crisis. The banking sector provides substantial funding for large-scale projects in mining and aerospace, among other industries in the country. In addition to financial services, travel and tourism are vital components of the service sector in Brazil. The direct contribution to Brazil’s GDP from this sub-sector is around 2.9% as of 2018. It includes revenue generated by hotels, travel agents, airlines, restaurants, and other directly supported activities.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Cost: The Brazilian currency is relatively weak compared to the Euro and US Dollar, making it an affordable option for foreign investment.
- High level of commitment: The Brazilian talent pool demonstrates a strong commitment to their work, ensuring high-quality output.
- Communication skills and teamwork: Brazilian professionals have excellent communication skills and are great team players, making them valuable assets for any business.

Henry He
Business Director, Wyser

With over 18 years of experience in the recruitment industry, I have worked in Gi Group for over seven years, Kelly Services as Practice Director for over six years, and also have executive search experience.

At Wyser, digitalization is one of our key specializations and investment areas. We support our clients in digital transformation, especially in traditional industries.

I hold a Master's degree in Biochemistry from Zhejiang University and have two sons. In my free time, I enjoy jogging and football.

What is the strongest Business Services segment in your country?

The strongest segments of business services in China are IT services, consultancy, and financial services, accounting for approximately 35%, 25%, and 20%, respectively.

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Digital transformation: The trend towards digitalization and automation is expected to continue in China, impacting various business services sectors.
- Expansion of service sector: As China transitions from a manufacturing-based economy to a more service-oriented one, opportunities for businesses in sectors like healthcare, education, and tourism, as well as professional services firms that support these industries, will arise.
- Increased emphasis on sustainability: Both businesses and the government will place greater importance on sustainability and environmental responsibility.

What do you think the future of Business Services in your territory will be?

The future of business services in China will be shaped by a combination of economic, technological, and social factors. Continued growth in professional services will be driven by the shift towards a service-oriented economy, and the trend towards digitalization and automation will accelerate, with businesses adopting new technologies to improve efficiency and competitiveness. Additionally, there will be an increased emphasis on sustainability and environmental responsibility.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Large and highly skilled workforce: China has a vast pool of highly skilled workers, including engineers, scientists, and technology specialists. There are over 8 million new Chinese university graduates each year in fields such as IT, engineering, and finance.
- Competitive labour costs: Lower labour costs compared to developed countries make China an attractive destination for outsourcing and offshoring business services, especially in areas like IT support, customer service, and back-office operations.
- Government support: China's government has implemented policies and incentives to attract foreign investment in business services, including tax breaks, subsidies, and streamlined regulatory procedures.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Conduct thorough market research: Understand the dynamics and challenges of the market by researching the target audience, competition, regulatory framework, and local business practices.
- Build strong local networks: Establish relationships with key stakeholders, attend local events, and join chambers of commerce to navigate the business landscape more effectively.
- Be responsive to local needs: Adapt products or services to local tastes, leverage local channels for marketing and distribution, and be sensitive to cultural differences in communication and business practices.

Maya Nair

Executive Director, Elixir Consulting

I am a seasoned HR professional with over two decades of experience in Talent Acquisition across various domains. I completed my Masters in Business Administration from the University of Kolkata and started my career with Manaksia Limited.

My multifaceted personality is the reason for my excellence in various scopes of my career. I first joined Elixir Consulting in 2003 as the Associate Director for the Technology and Consulting Practices. After a break in Japan, I returned to India and joined IBM India for six years, where I worked in various roles, such as AgileTA Leader, managing Social Media Recruitments, and building the Sourcing hub for leadership and niche roles.

In January 2019, I returned to Elixir Consulting to lead the Search and Selection practice for India. Throughout my career, my prowess and leadership qualities have added value to every organization I have been associated with.

Being a fitness enthusiast and fluent in multiple languages, I adapt well to diverse, multicultural environments.

What is the strongest Business Services segment in your country?

Technology and outsourcing have emerged as the strongest segments in BSS in India, with technology operations accounting for 50% of the market, followed by sales & finance (35%), and HR (15%).

In your territory, what are the 3 most significant Business Service Sector trends for 2023?

- Robotic Process Automation (RPA), AI, and cloud outsourcing: As companies realize the potential of robots for repetitive tasks, the demand for RPA, AI, and cloud outsourcing services is growing, with the market valued at more than \$1.4 billion.
- Remote work and shared services: Post-Covid, many prefer remote work, and the shared services sector is poised to gain from this trend, with organizations transferring more work to nearshore or offshore outsourcing.
- Focus on improving customer experience: Companies are increasingly focusing on enhancing customer experience to ensure quality. This requires rapid scaling up or down of the workforce’s activities.

What do you think the future of Business Services in your territory will be?

By 2025, India is expected to host the SSCs of 500 MNC, offering employment for up to 2 million people, as the country’s digital population grows due to the government’s Digital India initiative. India will continue to evolve as a global outsourcing hub, with multinational companies seeking to reduce their overhead costs.

What are the top three unique assets your talent pool has that make your country an attractive location for foreign investment in Business Services?

- Technology: India’s highly skilled and unique manpower is proficient in technology, enabling the country to retain 65% of the global outsourcing market.
- Analytics: India’s talent pool has strong analytics capabilities, which help shape the landscape of shared services offerings.
- Finance: India offers skilled professionals in the finance sector.

What would be three pieces of advice you would give to an investor who wants to start up a service/BPO centre in your country?

- Identify a high-demand business niche, considering the services to be offered and the activities involved, based on your understanding and expertise.
- Build a business plan after researching and evaluating the competition in the market, and identify your niche within the current services offerings.
- Invest in high-quality equipment and technology, ensuring digital security to attract clients and remain competitive in the digitalized market.

The perfect RPO choice process

STEP 1: Choose your direction

Grow your operations

- Start up in new locations
- Scale-up existing units
- Launch new products

Optimize your processes

- Eliminate hiring backlogs
- Fill gaps in your hiring process

Deep insight

- Specialized roles
- Time sensitive projects

STEP 2: Choose your model

Source & Screen

- Outsource initial candidate sourcing and screening activities to external experts.

Project RPO

- Delegate specific recruitment projects or positions to an external provider.

Full Cycle RPO

- Establish a comprehensive long-term partnership, outsourcing the entire end-to-end recruitment process to an external partner.

STEP 3: Choose your partner

Local insight

- 14+ countries
- 70 branches
- Deep knowledge of local markets

Global competence

- 100+ RPO solutions delivered
- Dedicated international coverage
- 20 languages
- Deep specialization in Business Services

Tradecraft

- Top-class recruiters
- Candidate Experience standards
- HPTI assessments
